
Assets List

As a manager I want to be able to view, add, and remove assets that need to be tracked.

Priority: High

Cost: 4 Days

View and Modify Asset Details

As part of the maintenance personnel I should be able to view existing information about an asset.

As an administrator I should be able to edit existing information about an asset.

Priority: High

Cost: 4 Days

Parts List

As part of the maintenance personnel I should be able to view and modify a list of parts that the asset needs to have maintained.

Priority: High

Cost: 4 Days

Fuel Economy

As a manager of a vehicle based company I should be able to track the fuel economy of my vehicles.

Priority: Medium

Cost: 3 Days

Verify data against values set by an administrator

As an administrator it would be nice if fuel economy values were verified against set values to catch entry errors.

Priority: Low

Cost: 1 Days

Parent :: Fuel Economy

Notifiable Fields

As an administrator it would be nice to set fields that would notify when the data entered is the cause of an issue that should be looked into.

Priority: Low

Cost: 1 Days
